### **What does it measure?**

Welcome to the Metric Tracking System (MTS). MTS is a performance measurement system that captures key financial management indicators across the Federal Government. The tool's intent is to provide government managers, Congress, and other stakeholders information to assess the financial management health of the Federal Government as a whole and for each individual agency. Tracking performance on indicators helps to guide financial management reforms and targets resources to areas where better stewardship is needed.

### **How are we doing?**

The CFO Council will use this space to summarize trends in the financial indicators. The summary will include progress, trends, and corrective actions (when applicable).

**Data Updated Through March, 2009**

[illegible]

A line graph titled "Absolute Percent Suspense Over 60 Days-Act 3875". The vertical axis (y-axis) represents the percentage of absolute percent suspense over 60 days, ranging from 0.00% to 50.00% in increments of 5.00%. The horizontal axis (x-axis) shows four time points: Jun 08, Sep 08, Dec 08, and Mar 09. A red line connects four data points marked with blue diamonds. The data points are: Sep 08 at 45.00%, Dec 08 at 4.00%, and Mar 09 at 2.00%. There is no data point for Jun 08, as the line starts at Sep 08.

# MTS Financial Management Indicators

## How are we doing?

Federal agencies are owed debts from a variety of individuals and entities. A few examples of debt are loan repayments, duplicate or erroneous grant or entitlement payments, as well as fines or penalties and other debts. These debts total billions of dollars government-wide. Improving the management of these debts – especially improved performance in the collection of outstanding debts – is important to ensuring that taxpayer dollars are spent wisely and efficiently.

Indicator 3, Delinquent Accounts Receivable from the Public, of the Metric Tracking System (MTS) reports on public debt that has been delinquent for more than 180 days. According to the metric goals, agencies have a way to go to meet the Green standard. What the data doesn't show, however, is why some agencies are reporting more delinquent debt than others. For example, some agencies: (1) have a high percentage of debt in litigation; (2) are attempting to collect from bankrupt debtors; or (3) are collecting debt at guaranteed lenders. Each of these efforts often takes considerable time to resolve.

Agencies are diligently working to reduce the amount of delinquent debt in this category by improving the screening of potential borrowers and improving internal agency collection practices. In the case of credit programs, improvements are also being made in litigating the debt at the Department of Justice, and transferring the debt to the Department of the Treasury for cross-servicing and administrative offset opportunities.
